

Smart plug on/off

SPR-01

Smart plug on/off with relay switching for 16 A loads. Plug directly to the electrical outlet to control lighting and other equipment.

The smart plug can be controlled from an integrated button on the side and wirelessly via the app or through other products from Plejd. It can also be controlled through third-party systems such as Google Home, for which a Plejd Gateway is required.

- Control loads up to 16 A.
- Integrated button for on/off load control.
- Time functions, such as timer and astro/time schedule..
- Scene from phone, tablet, or push button.
